

The scope of antibiotic resistance genes in sewages of Rostov-on-Don and lower Don River

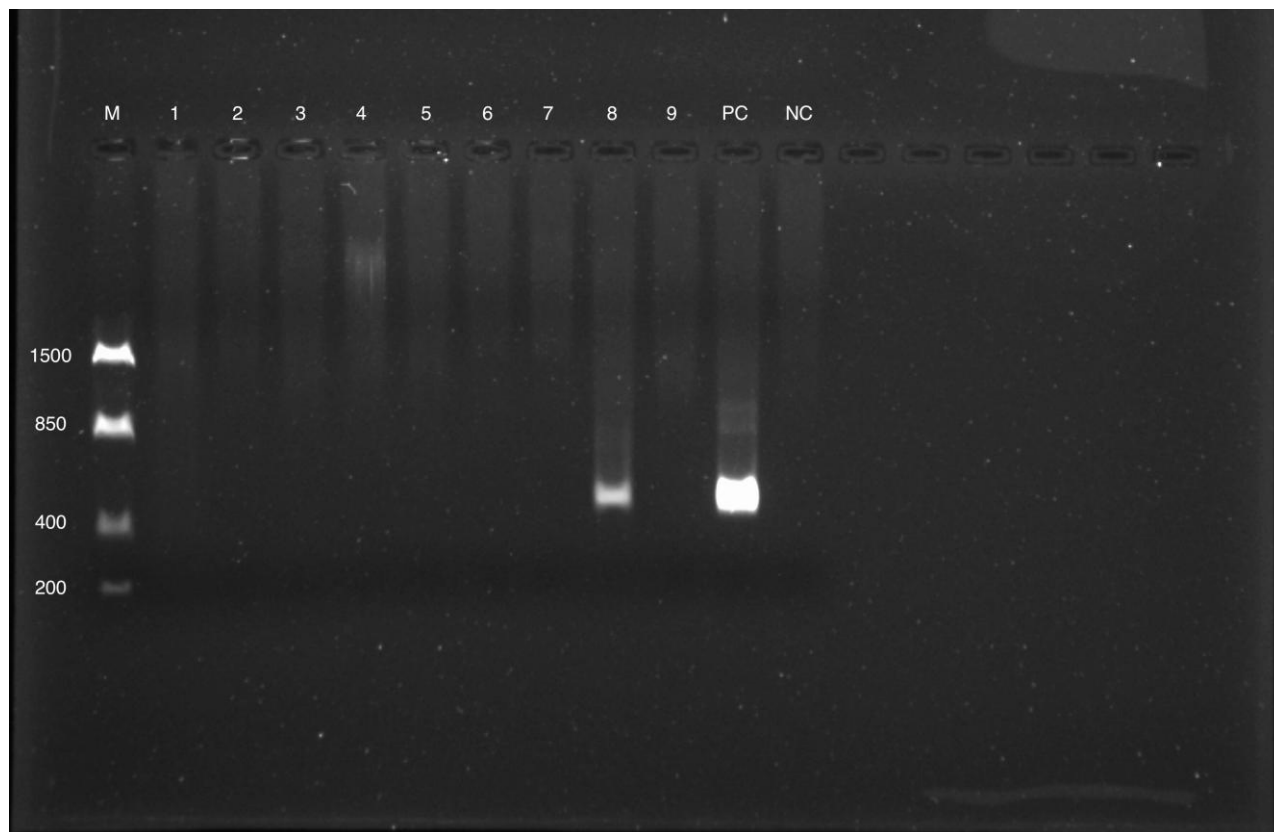

Figure S3. Agarose gel electrophoresis of PCR-amplified CTX-M genes in surface sediment samples.

Lanes: M – mol. weight marker; 1 – sample 18; 2 – sample 19; 3 – sample 20; 4 – sample 11; 5 – sample 12; 6 – sample 13; 7 – sample 22; 8 – sample 21; 9 – sample 23; PC – CTX-M positive control (495 b.p.); NC – negative control.
