New Potentials for Subatomic Particles to
Simulate Stable Atom and Particle-Wave
Nature Attosecond Simulations

Figure S1: Distance between electrons and nucleus in a Carbon atom with time.

Figure S2: Total energy of electrons for particle nature and wave nature of Carbon atom for six electrons (Core electron numbered 1 and valence electron numbered 6 on the x-axis).

Figure S3: Kinetic energy of electrons for particle nature and wave nature of Carbon atom for six electrons (Core electron numbered 1 and valence electron numbered 6 on the x-axis).

Figure S4: Potential energy of electron for particle nature and wave nature of Carbon atom for six electrons (Core electron numbered 1 and valence electron numbered 6 on the x-axis).
