

**Table 2.** Parameter estimates, standard errors, and associated probability

Variables	Factorial loading General Model
<b>Offensive Family Communication</b>	
Mother Offensive Communication	5.195 (.112) ***
Father Offensive Communication	3.998 (.100) ***
<b>Psychological Distress</b>	
Part 1 of Psychological Distress	2.911 (.040) ***
Part 2 of Psychological Distress	2.469 (.34) ***
Part 3 of Psychological Distress	2.469 (.034) ***
<b>Positive Attitude Towards Transgression of Rules</b>	
Item 4	.440 (.015) ***
Item 8	.649 (.015) ***
Item 9	.725 (.014) ***
Item 10	.608 (.015) ***
<b>Child-to-Parent Violence</b>	
Child-to-parent Violence Mother	2.631 (.092) ***
Child-to-parent Violence Father	2.263 (.092) ***

*Notes:* Robust statistics. Standard errors in parentheses. Factors were set to 1 robust statistics.

Standard errors in parentheses. Factors were set to 1. \*  $p < .05$ ; \*\*\*  $p < .001$ .
