INSTRUCTIONS FOR USE

SYMPFINY® COMPONENTS

Barrel Plunger Multiparticulate

FILLING & DELIVERING

1 Open the multiparticulate container by pressing down and turning counter-clockwise.

2 Insert the syringe by aligning the tabs on the syringe tip with the tab acceptance slots on the bottle.

TIP Hold the barrel when inserting.

TIP Partially withdraw the plunger prior to inserting.

3 Flip the bottle vertical.

4 Set the dosing amount by pulling the plunger back to the correct dose marking.

BACK

FILLING & DELIVERING CONT.

5 Tap the bottleneck 3 times to fill the syringe with drug. Remove the syringe in a vertical position.

TIP Hold the barrel when removing the syringe.

6 Fully depress the plunger inside the child's mouth to deliver the drug.

7 Give the child water to drink after receiving the dose.

CLEANING

8 Rinse and dry the syringe tip with the plunger fully depressed.

9 Remove the plunger from the barrel and allow to air dry for 1 hour before next use.
