The Anti-inflammatory Effects of Cannabis sativa Extracts on LPS-Induced Cytokines Release in Immune and Non-immune Cells in Vitro

Mariia Zaiachuk [†], Santosh V Suryavanshi ^{†,*}, Nazar Pryimak, Igor Kovalchuk ^{*}, Olga Kovalchuk ^{*}

Figure S1. The trypan blue cell viability assay photos were taken 3 minutes after staining with trypan blue using LUNA automated cell counter

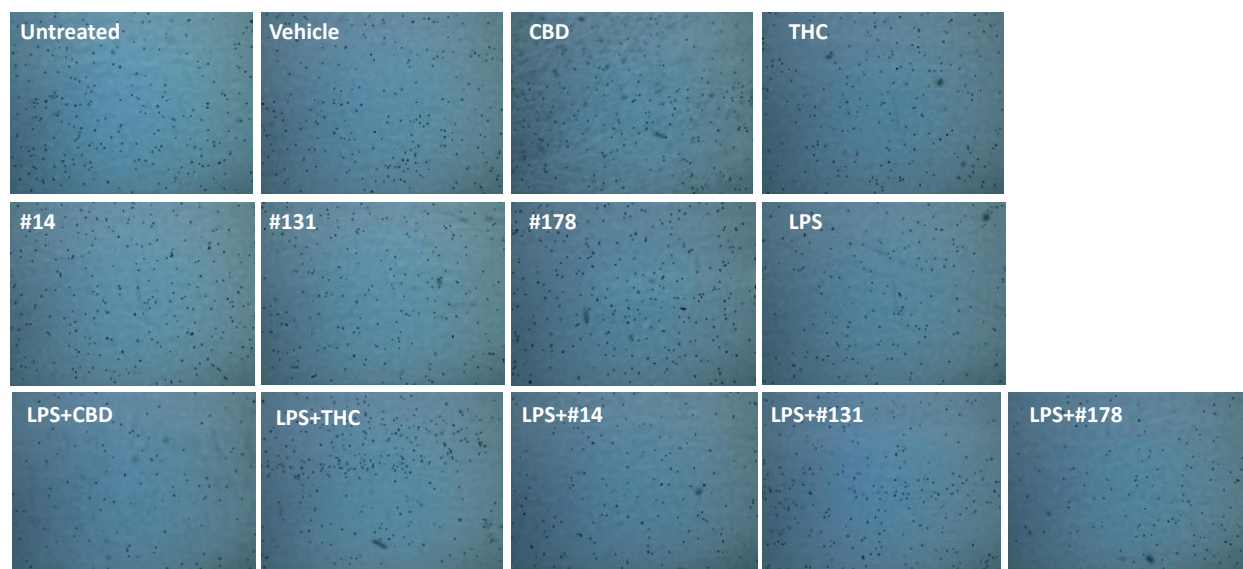

Figure S2. Comparison of cytokine induction between CBD and THC or extracts. A – IL-1 β ; B – IL-6; C – TNF- α ; D – IL-10; E – MCP-1; F – IL-8. Results are presented as mean of calculated concentration [pg/ml] \pm SD. Statistical analysis was performed by ANOVA followed by Tukey post-hoc multiple comparison test. Significant differences between groups are marked with: * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$, **** $p < 0.0001$.
