

## Response to Editor

*There is no table, graph, or diagram taken from another paper. I have used a reference for Fig. 1, though we have modified that diagram somewhat. I tried and checked that diagram, but that diagram is the open hand. They do not have any copyright for that. They also mention that it is free for anyone, even though we have modified it.*

*So, there is no copyright for any diagram and table because we made everything ourselves.*

*There is no copyright claim in Figure 1, Even though I have somewhat modified it.*
